

POWER BI PROJECT 2

Doing a case study helps you strengthen your skills by practicing what you have learned in other courses. So, the focus is on combining your skills to bring solutions to a real-world problem. For this case study;

You will use an invented dataset from WarneHands Incorporated Company.

You are hired as a consultant to analyze the inventory data and give some insights into which would be the best items for renewing or increasing inventory.

Publish your work in power BI service.

(70 Mrks)

- ***NB: Submit the results in a power point report, include screenshots and interpretations.***
